

Magic Mirror on the net,

What's the fairest license yet?

A GPLv3 fairness tale

Summary

- Overview
- Fairness model
- The spirit of the GPL
- Major changes in GPLv3
- Wrap up

Once upon a time...

- GPLv2: good old license
- Patents
- Technical restrictions
- Discrimination
- Internationalization

Improved fairness

Fairness model

Quid pro quo? Tit for tat?

- Showing each other the code?
- Publishing code and changes?
- Granting permissions to each other?
- Respecting others' freedoms!

Payforward!

The spirit of the GPL

Respecting and **preserving** the 4 freedoms

0: Run for any purpose

1: Study and adapt

2: Redistribute

3: Distribute modifications

Copyleft: the responsibilities

Patent licenses

- Prince wrote a GPLed program
- Witch (holds patent) modifies it
- Witch passes it on
- Snow White improves it
- Witch sues Snow White

Explicit patent license

Patent ploysideways

- Sneezzy wrote a GPLed program
- Witch (holds patent) modifies it
- Witch does **not** pass it on
- Grumpy improves Sneezzy's program
- Witch sues Grumpy

Copyright infringement

Regenerate infringers

- Huntsman lies about killing Snow White
- Much later, he's punished
- Compliance is the best remedy
- Sixty-days timeout for notice
- Thirty days to fix first infringement

Leads to compliance

Compatibility

- Happy wrote GPLv2 program
- Sleepy wrote Affero GPL 1.0 program
- Can't share or bug-fix license without "or above"
- GNU Affero GPL 3+, Apache 2.0
- Warranty, legal notices, attribution, marking changes, publicity of marks and names

Internationalization

- Avoiding terms with juridic meaning
 - Propagation: all but running and adapting
 - Conveying: propagation such that others can make or receive copies, except sublicensing
- International copyright principles
- Avoiding references to local laws

A global license

Distribution modes

- Written offer only to recipients
 - Snow White shares her soup recipe
 - Satisfiable with network downloads
 - Royal Recipe Repository: rrr.gov.fg
- Peer-to-peer transmission of binaries
- Mirrors can point at sources elsewhere

Magic mirror likes GPLv3

Corresponding sources

apple executable

poison signature

poisoning building

DNA sources

Snow White AntiVo DVR

sleeping functioning

Must offer sources!

Breaking the spell

antidote bug fix

blocked throat signature checking

other potions improvements

Tivoization

- Withholding **key** sources **and**
- Blocking installation of unsigned binaries
- Have the freedoms, can't use them
- “Functional” signatures
- Separate signatures (poisoned skin)
- Installation instructions for “User Products”
- ROM is ok, **nobody** can make changes

Technical and legal measures

- No to inventing excuses
- No to wielding legal weapons
 - Huntsman could have killed Snow White
 - Lets her go in freedom
- Undesirable misfeatures can be removed
- Too bad for DRM

Must payforward the freedoms!

Discriminatory agreements

v2: Can't distribute without freedoms

- Disclaiming patent license, public sources
- Limited patent license to select recipients?
- Can't distribute along with limiting privileges
- Must extend patent license to all recipients

Just M\$ay No!vell

Conclusion

- Preserves spirit
- Plugs holes
 - Preemptively?
- Improves fairness
- Why not?
- Released on 2007-06-29

Freedom upgrade! Mirrors rejoice!
